FEE SCHEDULE FOR INSPECTION SERVICES Effective for Laboratories Inspected in 2012

This schedule has been established for laboratory inspections within the continental United States. This fee schedule applies to laboratories that are inspected during 2012. Two levels of fees exist in the schedule. The "NORMAL SEQUENCE" rate is used when inspections are conducted during the inspection sequence established by CCRL. The "OUT OF SEQUENCE" rate is applied when the laboratory requests a different date of inspection than that tentatively established by CCRL. Any extraordinary expenses including air fare, shipping charges, and rental car which have been incurred in making the out of sequence trip will be added to the out of sequence fee.

Inspection fee rates of facilities for the following material types at one location:

	NORMAL SEQUENCE	OUT OF SEQUENCE
Cement (including laboratory quality system)	\$4,550	\$6,825
C1157 Optional ¹ (must request cement inspection with this option)	\$570	\$570
Cement and concrete ²	\$5,930	\$8,895
Concrete ²	\$2,620	\$3,930
Concrete ² and aggregate ²	\$3,390	\$5,085
Aggregate ²	\$1,780	\$2,670
Cement, concrete ¹ and aggregate ²	\$6,990	\$10,485
Pozzolan	\$3,390	\$5,085
Pozzolan and cement	\$5,680	\$8,520
Pozzolan and concrete ²	\$5,930	\$8,895
Pozzolan, cement and concrete ²	\$7,760	\$11,640
Pozzolan, concrete ² and aggregate ²	\$6,990	\$10,485
Pozzolan, cement, concrete ² and aggregate ²	\$8,420	\$12,630
Reinforcing bars	\$1,040	\$1,560
Reinforcing bars with a concrete inspection	\$880	\$1,320
Concrete masonry units/brick	\$2,620	\$3,930
C1019 Optional (must request either concrete or CMU/Brick inspection with this option)	\$370	\$370
Concrete masonry units/brick with another inspection ³	\$1,780	\$2,670
Masonry mortar	\$1,780	\$2,670
Masonry mortar with a cement or pozzolan inspection ³	\$370	\$555
Masonry mortar and concrete masonry units/brick	\$3,390	\$5,085
Masonry mortar and concrete masonry units/brick with a cement inspection ³	\$2,140	\$3,210
Masonry mortar, Concrete masonry units/brick with another inspection ³	\$2,570	\$3,855
Extra compression testing machine ⁴	\$880	\$1,320
AASHTO R18 (must be reviewed with an accompanying Quality System) ⁵	\$350	\$350

¹ Optional method includes C186, C1012 & C1038

² Fee is based on the required methods in ASTM C1077. An additional fee (\$190) is charged for each optional method requested by the laboratory and reviewed during the concrete or aggregate inspection. Optional methods available are listed below:

C29, C42, C70, C78, C87, C88, C123, C131, C142, C157, C174, C186, C192, C215, C227, C232, C233, C289, C293, C295, C341, C403, C418, C441, C457, C469, C495, C496, C512, C531, C535, C567, C586, C597, C641, C642, C666, C672, C684, C779, C780 (Annex 6), C803, C805, C827, C873, C876, C882, C900, C918, C939, C944, C1012, C1038, C1040, C1074, C1084, C1090, C1105, C1137, C1140, C1138, C1152, C1170, C1176, C1202, C1218, C1260, C1293, C1314, C1383, C1399, C1404, C1567, C1583, C1609, and D2419

³ Does not include fees of other programs

⁴ The inspection fees are based on the verification of one compression testing machine in each cement, concrete, pozzolan, masonry mortar, and masonry CMU/brick testing laboratory and one tensile testing machine for the testing of steel reinforcing bars. A fee is charged for each additional machine.

⁵ Must be accompanied by another Quality System (C1077, C1093, or C1222)
